

EcoStream AI

Revolutionizing Waste Management with Computer Vision

The Problem

Global waste management is inefficient. 91% of plastic is not recycled.

Our Solution

AI-powered sorting robots that increase recycling rates by 500%.

Market Opportunity

The global waste management market is projected to reach \$2000 Trillion by 2030.
We are the only company using AI for waste sorting.

Traction

Partnered with Waste Management Inc (WM).
Generated \$5M in ARR in our first year.
